

30th April 2009

MARCH 2009 QUARTERLY ACTIVITIES REPORT

Posse Iron Project, Minas Gerais, Brazil (CAS 100%)

In January 2009, Crusader Resources Ltd (ASX:CAS) (Crusader) reported a major increase in the JORC compliant resource estimate at the Posse Iron project in Minas Gerais. An Indicated and Inferred Mineral Resource of 36.02 million tonnes at an average grade of 43.5% iron has been estimated by Coffey Mining (see Table 1 below).

This new estimate is more than four times the previous estimate of 7.7Mt @ 45% iron which was prepared in May 2008. The increase is largely due to the re-modelling of the geology and the extension of the inferred resource boundary to the south and at depth. This increase in tonnes has been achieved without a significant change in the overall resource grade.

Table 1. January 2009 Mineral Resource table for Posse Iron Project

	Tonnes	Fe	SiO ₂	Al ₂ O ₃	Mn	P	LOI*
	(Mt)	(%)	(%)	(%)	(%)	(%)	(%)
Indicated Resources	4.83	47.39	27.56	1.82	0.25	0.020	1.38
Inferred Resources	31.18	42.89	36.17	0.61	0.17	0.026	0.73
Total	36.02	43.50	35.02	0.77	0.18	0.024	0.82

*LOI is the loss on Ignition.

The Inverse Power of Distance (IDW2) method of estimation has been used to obtain estimates of iron (Fe), silica (SiO₂), aluminium (Al₂O₃), manganese (Mn), phosphorus (P) and loss of ignition (LOI) grades. The grade estimate has been classified as an Indicated and Inferred Mineral Resource based on the guidelines set out in the JORC Code (2004). No cutoff was applied to the estimation.

Grade was estimated within a mineralised envelope based on geological interpretation, measured bulk density values and drill assay results from the SGS Geosol Laboratory located in Belo Horizonte- Brazil.

The Scoping Study which Coffey Mining is preparing is close to completion. Licensing of the project at the mines and environmental departments is continuing.

Other projects in Brazil (CAS 100%)

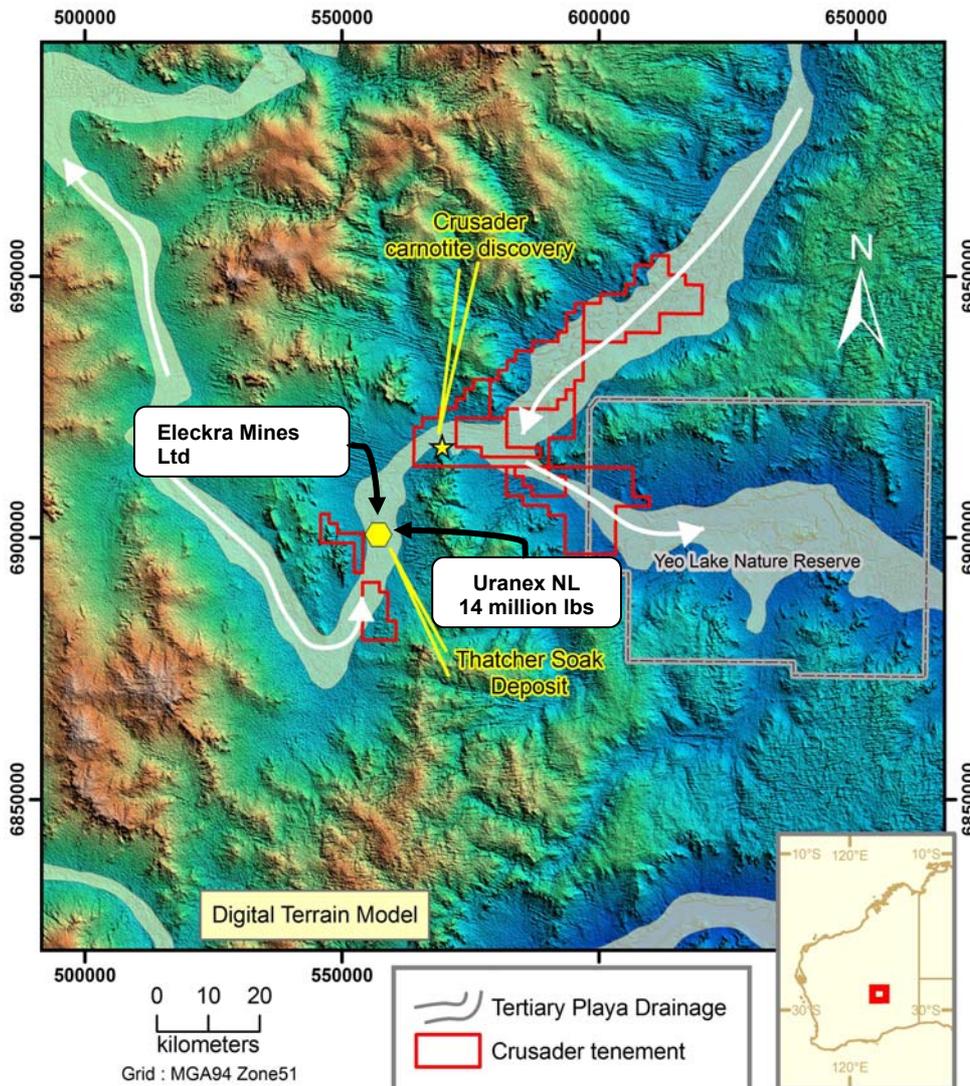

No exploration work was carried out on these projects during the quarter. Crusader is working towards the sale or joint venture of these projects. Information Memorandums have been prepared on the Juru

For personal use only

Belem gold project, the Tarantula tungsten project and the Ouro Belo tin/gold/indium project. Several interested parties are reviewing the data.

Lake Throssell, Western Australia (CAS 100%)

Crusader’s Lake Throssell project is located 150km east of Laverton in the Great Victoria Desert of Western Australia. The company owns a 100% interest in the Lake Throssell tenements which cover an area of >1100 km². The project area includes upstream and extensive downstream environments of the Palaeochannel which hosts the Thatcher Soak calcrete-style uranium deposit. Crusader’s Lake Throssell tenements are shown on the diagram below:

Negotiations with traditional owners and their representatives over access to the tenements are continuing.

For personal use only

Southern Cross Gold, Western Australia (CAS 80-100%)

Crusader has agreed to sell all of its tenements in the Parker Range district near Marvel Loch to Southern Cross Goldfields. Crusader will receive 750,000 Southern Cross Goldfields shares. The sale has been delayed due to problems with title transfer, however is expected to be completed in the second quarter of 2009.

Corporate

Crusader has a current cash balance of \$1.1M AUD. There are 44,664,081 ordinary shares on issue. Crusader continues to carefully monitor expenses and the cash balance of the company.

About Crusader

Crusader Resources Ltd (ASX:CAS) is a minerals exploration company focussed on the identification, acquisition and development of projects in Brazil. The company has a diverse portfolio of projects including iron ore, tin, gold, tungsten and uranium. Crusader applies leading edge exploration skills to the discovery of new assets and continues to utilise its strong networks in Brazil to identify new opportunities.

The company's most mature project is the Posse Iron project which is located in the Iron Quadrilateral in the state of Minas Gerais, 30km from the regional capital and iron ore mining centre of Belo Horizonte. Crusader has upgraded the Mineral Resource estimate at Posse to 36Mt at 43.5% Fe which is now the subject of a scoping study.

Crusader recently strengthened its iron ore focus through a strategic partnership with Canadian company G4G Resources Ltd. The partnership intends to acquire iron ore fines in Brazil as feedstock for the production of saleable iron units utilising the Finesmelt™ process.

The Ouro Belo Tin-Indium-Gold project covers more than 400km² in the Goias Tin province, located in the northeast of Goias state approximately 300km from the national capital of Brasilia. Several significant areas of garimpiero workings have been identified, mapped and sampled. Crusader has recently drilled the Manga prospect and continues exploration activities at other regional prospects.

The Tarantula tungsten project is located in Rio Grande do Norte state, northeast Brazil. The project comprises an area of 13.2 square kilometres within the Serido tungsten province and covers the geological extension to the mine sequence of several important tungsten mines.

Crusader also has an extensive portfolio of gold properties located in the state of Paraiba in the northeast of Brazil. These projects include significant historic production (to 150,000ozs) and display regional structural settings that are highly favourable for significant gold mineralisation.

In Australia, Crusader retains a portfolio of projects prospective for palaeochannel uranium and Archaean gold and nickel.

Crusader Resources Ltd has 44,664,081 ordinary shares on issue.

Notes

1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.

2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.

3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.

4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.

5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
